

How to configure an iPhone for New 2013 Hosted Exchange

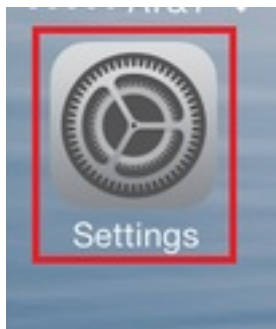

How to configure an iPhone for New 2013 Hosted Exchange

This article will configure an Exchange 2013 account on your iOS device.

Note: The images in this walk through are from an iPhone 5s running iOS 7.

Though screens on other iOS devices will differ in appearance, the process remains the same.

1. To begin, on the Home Screen tap on **Settings**

2. Then **Accounts & Passwords**

 **iTunes & App Store** >

 **Wallet & Apple Pay** >

 **Accounts & Passwords** >

 **Mail** >

 **Contacts** >

 **Calendar** >

 **Notes** >

 **Reminders** >

 **Phone** >

 **Messages** >

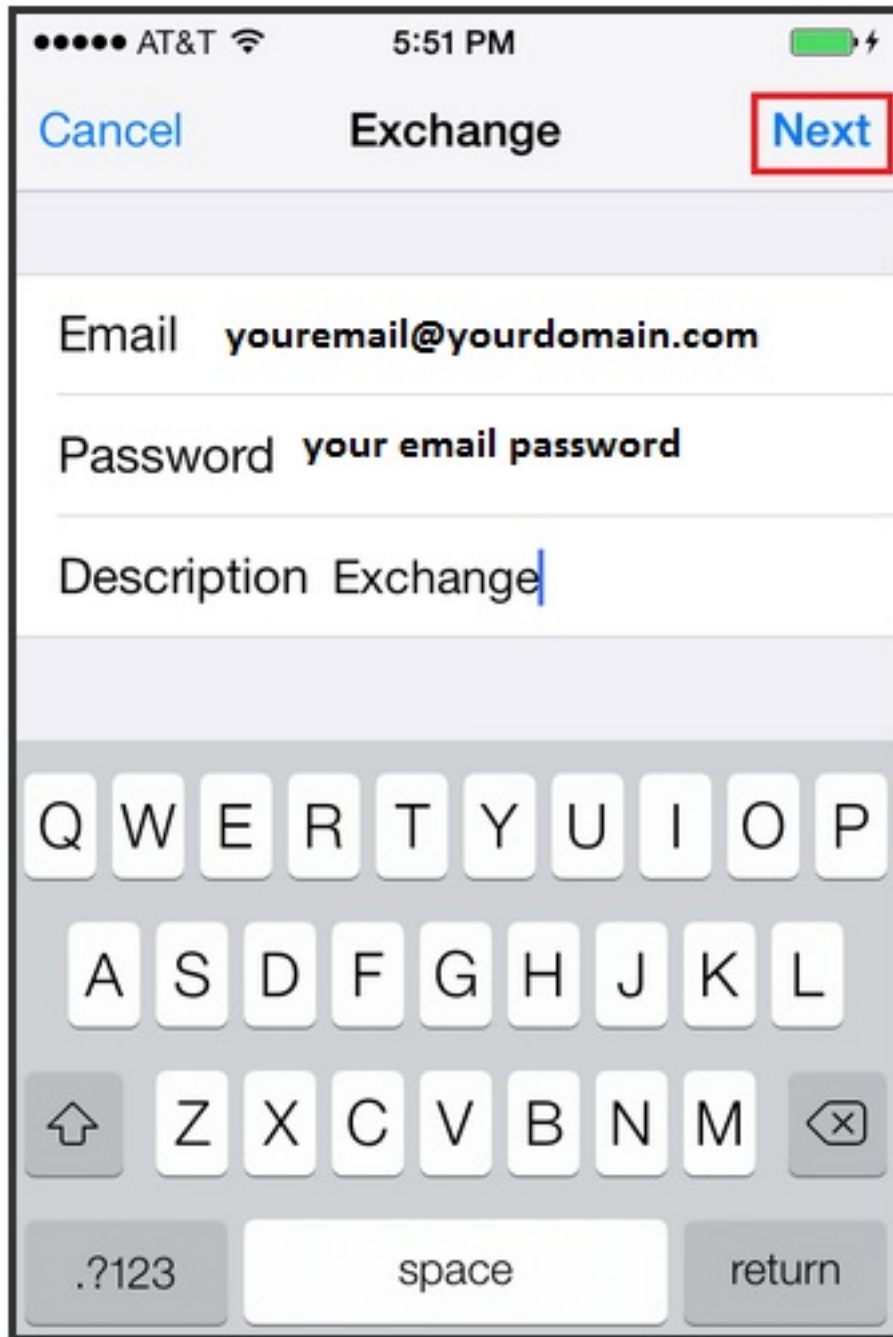

3. Then Add Account.

4. Select Exchange

5. Fill in your **Email address** and **password**. The description can be anything you would like. Tap Next.

6. From the pop-up

The screenshot shows the 'Exchange' settings screen on an iPhone. At the top, the status bar displays 'AT&T', signal strength, '5:57 PM', and battery level. The title bar contains 'Cancel', 'Exchange', and a 'Save' button (highlighted with a red box). The form fields are as follows:

Email	youremail@yourdomain.com
Server	outlook.naturalnetworks.com
Domain	<i>leave blank</i>
Username	youremail@yourdomain.com
Password	your email password
Description	Exchange

7. Input the Server "outlook.naturalnetworks.com"
8. Leave DOMAIN leave blank
9. Enter your **email address** as your **Username** and rener your **Password**. Tap **Save**.
10. Select the services that you wish to sync with the Exchange Server. Tap **Save**.

11. You done and your email should be working!
