How to configure an IPhone for New 2013 Hosted Exchange
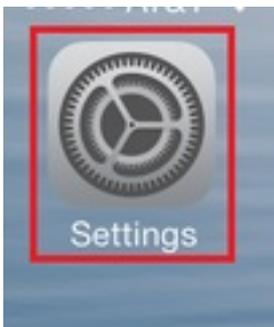

How to configure an iPhone for New 2013 Hosted Exchange

This article will configure an Exchange 2013 account on your iOS device.

Note: The images in this walk through are from an iPhone 5s running iOS 7.

Though screens on other iOS devices will differ in appearance, the process remains the same.

1. To begin, on the Home Screen tap on **Settings**

2. Then **Accounts & Passwords**

|		
![iTunes & App Store icon]	iTunes & App Store	>
![Wallet & Apple Pay icon]	Wallet & Apple Pay	>
![Accounts & Passwords icon]	**Accounts & Passwords**	>
![Mail icon]	Mail	>
![Contacts icon]	Contacts	>
![Calendar icon]	Calendar	>
![Notes icon]	Notes	>
![Reminders icon]	Reminders	>
![Phone icon]	Phone	>
![Messages icon]	Messages	>

3. Then **Add Account**.
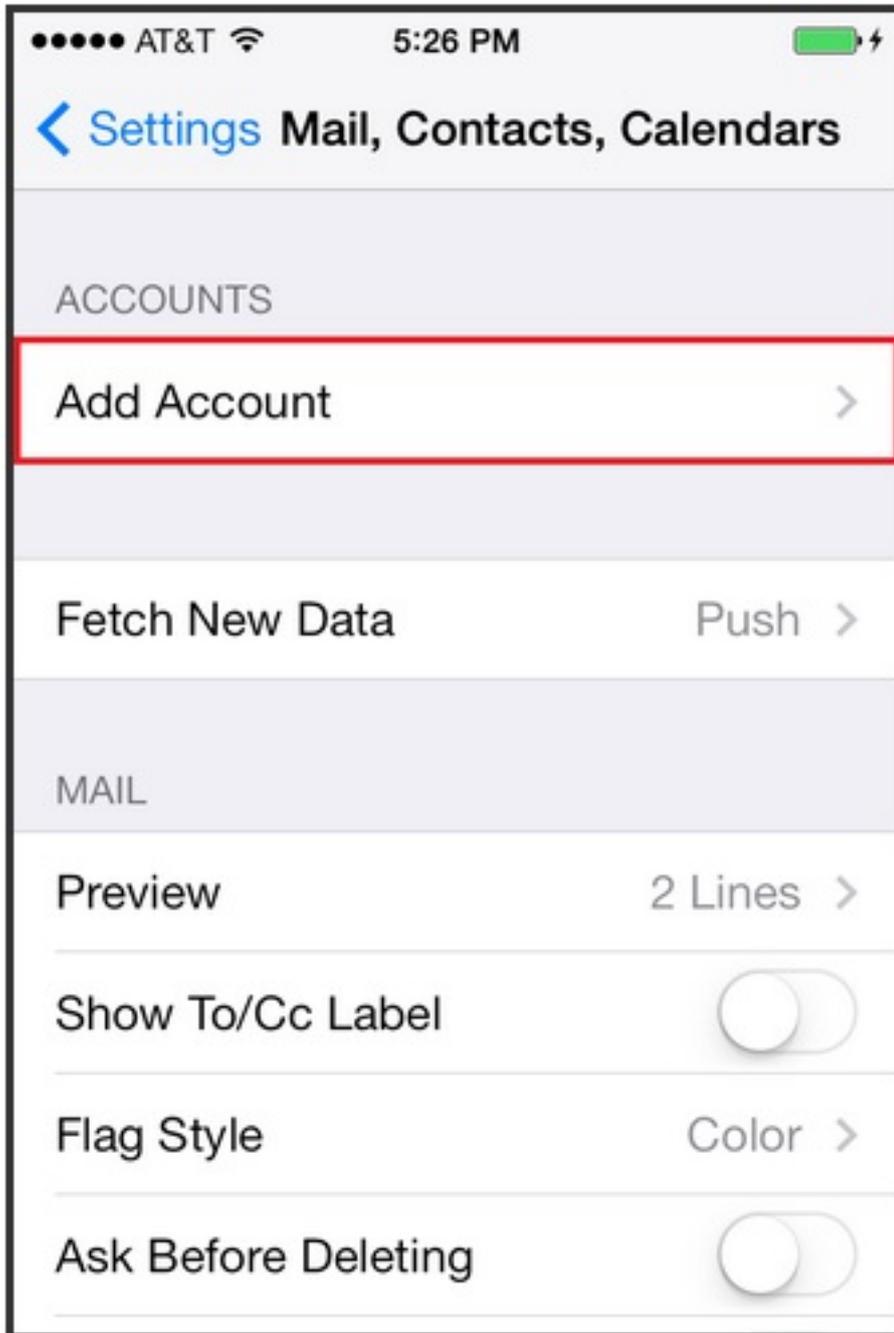

4. Select **Exchange**

5. Fill in your **Email address** and **password**. The description can be anything you would like. Tap **Next**.

6. **From the pop-up**

7. Input the **Server "outlook.naturalnetworks.com"**
8. Leave **DOMAIN** leave blank

9. Enter your **email address** as your **Username** and renter your **Password**. Tap **Save**.
10. Select the services that you wish to sync with the Exchange Server. Tap **Save**.

11. **You done and your email should be working!**
