

AMS360 Chrome Flags

If you receive a grey dialogue box upon attempting to sign into AMS with chrome, located mid y-axis and top X-axis, that refers to comm or components, then you must change a chrome experimental DevFlag. See screenshot below:

The screenshot shows the Chrome Flags interface at `chrome://flags`. At the top, there is a search bar labeled "Search flags" and a "Reset all" button. A tooltip for the "Reset all" button displays the text: "ConnectWise Control Remote Support Software vertafore.screenconnect.com". Below the search bar, the title "Experiments" is shown, along with the build number "85.0.4183.121". A warning message states: "WARNING: EXPERIMENTAL FEATURES AHEAD! By enabling these features, you could lose browser data or compromise your security or privacy. Enabled features apply to all users of this browser." A link "Interested in cool new Chrome features? Try our [beta channel](#)." is also present. The interface is divided into "Available" and "Unavailable" sections. The "Available" section contains the following entries:

- SameSite by default cookies**
Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android
[#same-site-by-default-cookies](#)
Status: **Disabled**
- Temporarily unexpire M83 flags.**
Temporarily unexpire flags that expired as of M83. These flags will be removed soon. – Mac, Windows, Linux, Chrome OS, Android
[#temporary-unexpire-flags-m83](#)
Status: **Default**
