

# AMS360 Chrome Flags

If you receive a grey dialogue box upon attempting to sign into AMS with chrome, located mid y-axis and top X-axis, that refers to comm or components, then you must change a chrome experimental DevFlag. See screenshot below:

The screenshot shows the Chrome flags page at `chrome://flags`. At the top, there is a search bar with the text "Search flags" and a "Reset all" button. A notification box for "ConnectWise Control Remote Support Software" is visible. The page title is "Experiments" and the version is "85.0.4183.121". A warning message states: "WARNING: EXPERIMENTAL FEATURES AHEAD! By enabling these features, you could lose browser data or compromise your security or privacy. Enabled features apply to all users of this browser." Below this, there is a link to the "beta channel". A progress bar indicates that approximately 50% of flags are available. Two flags are listed:

- SameSite by default cookies**: Treat cookies that don't specify a SameSite attribute as if they were SameSite=Lax. Sites must specify SameSite=None in order to enable third-party usage. – Mac, Windows, Linux, Chrome OS, Android. [#same-site-by-default-cookies](#). The dropdown menu is set to "Disabled".
- Temporarily unexpire M83 flags**: Temporarily unexpire flags that expired as of M83. These flags will be removed soon. – Mac, Windows, Linux, Chrome OS, Android. [#temporary-unexpire-flags-m83](#). The dropdown menu is set to "Default".
