# Disable Versioning In SharePoint for QuickBooks use in MS Teams

Disable Versioning In SharePoint for QuickBooks use in MS Teams

when backing up SharePoint / Teams that has any QuickBooks database's using Veeam a historical version is created with each change/entry into QuickBooks, this makes the size of data in the cloud grow exponentially, which require more and more backup space to be allocated at the customers expense, disabling versioning prevent this growth.

Step #	Task	Screenshot
1	Navigate to the library where you want to disable versioning	
2	**Gear Icon > Library Settings**	

		Office 365 settings SharePoint settings Add a page Add an app Site contents Library settings Getting started Site information Site permissions
