How to Configure Outlook 2007/2010/2013 using IMAP

First click on start, then click on control panel, here look for the Mail Icon and double click it.

At this window click on "Email Accountsâ€\a€\

This will start the "Accounts Settings" wizard. Under the Email tab, click the "Newâ€\a€ butto

This will launch the "Add New Email Account" wizard. Select "Microsoft Exchange, POP3, IMAP, or HTTP." And click next.

At the "Auto Account Setup" screen, check the box to the bottom left corner of the window that reads "Manually configure server settings or additional server types" and click next.

	Internet E-mail Settings Each of these settings are required to get your e-mail account working.	
	User Information Test Account Settings	
	Your Name: John Doe After filing out the information on this screen, we recommend you test your account by cicking the	
	E-mail Address: jdoe@YOURDOMAIN.com button below. (Requires network connection) Server Information	
	Account Type: IMAP	
	Incoming mail server: Imap.YOURDOMAIN.com	
	Outgoing mail server (SMTP): smtp.YOURDOMAIN.com	
	Logon Information User Name: Idoe@V/OLRDOMAIN.com	
	Password:	
	Remember password	
	Require logon using Secure Password Authentication (SPA) More Settings	
	«Back Next» Cancel	

Once the "Internet Email Settings" window comes up, click on the "Outgoing Server"

tab, and place a check into the box that reads "My outgoing (SMTP) server requires authentication" and then click on the advanced tab.

At the advanced tab, change the "Outgoing server (SMTP)" port from 25 to 587 then click ok.

Then click finished, then click close, and launch Outlook; once Outlook has started create a new email, and send it to yourself, then click send and receive. If you received your own email, everything has been configured correctly. If not, please go back and make sure all the settings are correct and you entered in your password correctly.
