How to pull specific event ID’s from Event Viewer to a .csv file using PowerShell

Step#	Task
1	From either a computer on the same n as the machine with the logs or directl machine with the logs launch Powersh admin
2	Run the command: $StartDate = (Get-Date).adddays(-##) Replace the ## with how many days y to go back from today.
3	Then run: Get-WinEvent -ComputerName ‘MachineName’ -FilterHashtable @{lo Security';id=’eventid,eventid,etc’;data= me';StartTime=$StartDate}	Export-c C:temp’NameofFile’.csv Replace the following values: ‘MachineName’ = The computer you w pull logs from, or delete the entire stri ‘-ComputerName ‘MachineName’ if y running it on the computer in which y the logs

	‘eventid’ = These are the event IDs yo looking for for example 4624,4634 ‘Username’ = With the user login with domain part ‘NameofFile’ = The title your want fo file.
